User Journey Map

From Landing to Completing a Copy Trade

Phase 1: Discovery & Landing
User arrives at GMGN.AI homepage
↓
Views market analytics (New Creations, Completing, Completed)
↓
Explores token cards with real-time data

Phase 2: Authentication

User clicks "Log In" or "Sign Up" button
↓
Modal opens with authentication options
↓
User completes authentication (demo mode available)
↓
Header updates to show logged-in state with wallet info

Phase 3: Navigation to Copy Trading

User clicks "CopyTrade" in navigation menu
↓
Navigates to Copy Trade ranking page
↓
Views trader leaderboard with performance metrics

Phase 4: Trader Selection & Analysis
User browses trader rankings and filters
↓

Clicks on trader profile to view detailed analytics
↓
Reviews trader's PnL, win rate, distribution, and activity
↓
Analyzes phishing check and security metrics

Phase 5: Copy Trade Setup

User clicks "Copy trade" button
↓
Copy trade panel slides in from right
↓
User configures trade parameters:
- Max buy amount
- Fixed buy/ratio settings
- Sell method preferences
- Advanced settings (slippage, priority fee, anti-MEV)
↓
User confirms and activates copy trading

Phase 6: Monitoring & Management
User can monitor active copy trades
↓
Access wallet manager for portfolio overview
↓
View trading activity and performance metrics

Interaction Flow Descriptions

1. Authentication Flow

Trigger: User clicks "Log In" or "Sign Up" in header
Flow:

1. Modal slides up from bottom (mobile) or fades in center (desktop)
2. User sees authentication options: Email, Telegram, Phantom wallet
3. User selects authentication method
4. For demo: Any email/password combination works

5. Modal closes with success animation
6. Header updates to show logged-in state with wallet balance
7. Search bar becomes visible
8. Wallet dropdown becomes available

2. Copy Trade Discovery Flow

Trigger: User clicks "CopyTrade" in navigation menu
Flow:

1. Page transitions to Copy Trade ranking view
2. Loading animation shows while fetching trader data
3. Table/cards populate with trader performance metrics
4. Filter tabs allow refinement of trader list
5. Sorting options available via column headers (desktop)
6. Real-time updates show changing rankings

3. Trader Profile Analysis Flow

Trigger: User clicks on trader row/card in rankings
Flow:

1. Page transitions to detailed trader profile
2. Three-card layout loads with key metrics
3. Phishing check section displays security analysis

1. Activity tabs allow switching between data views
2. Timeframe filters update displayed data
3. Holdings table shows detailed token performance
4. "Copy trade" button prominently displayed for action

4. Copy Trade Setup Flow

Trigger: User clicks "Copy trade" button
Flow:

1. Panel slides in from right side of screen
2. Lightning mode toggle defaults to enabled
3. Current wallet automatically selected
4. Copy source pre-filled with trader's address

5. User configures trade parameters:
    - Max buy amount with SOL balance validation
    - Fixed buy/ratio settings with tooltips
    - Sell method selection with strategy explanation
6. Advanced settings collapsible section:
    - Slippage tolerance configuration
    - Priority fee adjustment
    - Anti-MEV RPC toggle
7. Real-time validation of all inputs
8. "Clear" button resets all settings
9. Confirmation step before activation

5. Wallet Management Flow

Trigger: User clicks wallet dropdown → "Wallet Manager"
Flow:

1. Page transitions to wallet manager interface
2. Two-column layout loads with wallet list and details
3. Primary wallet highlighted and selected by default
4. Wallet details show balance and action buttons
5. Action buttons provide quick access to:
    - Deposit (shows QR code/address)
    - Withdraw (opens send interface)
    - Buy (integrates with DEX)
    - Consolidate (combines small balances)
    - Distribute (splits to multiple addresses)
6. Activity section shows transaction history
7. Import/Create buttons add new wallets

6. Token Trading Flow

Trigger: User clicks token card on main page
Flow:

1. Page transitions to TradingView interface
2. Token header shows name, symbol, and key metrics
3. Interactive chart loads with multiple timeframes
4. Activity feed shows real-time transactions
5. Filter tabs refine transaction display
6. Mobile: Bottom action bar with Buy/Sell/Info buttons

7. Desktop: Integrated trading controls in sidebar
8. Back button returns to main market view

7. Navigation Flow

Trigger: User clicks navigation elements
Flow:

- GMGN Logo/Trenches: Returns to main market analytics
- Mobile tabs: Switches between sections with smooth transitions
- Search: Opens command palette with token/wallet search
- Chain selector: Switches between different blockchains
- Settings: Opens user preferences and configuration

8. Responsive Behavior

Mobile Adaptations:

- Navigation collapses to bottom tab bar
- Tables convert to card-based layouts
- Copy trade panel becomes full-screen overlay
- Touch-optimized button sizes and spacing
- Swipe gestures for navigation between sections

Desktop Enhancements:

- Hover states on interactive elements
- Keyboard shortcuts (⌘K for search)
- Multi-column layouts for efficient space usage
- Contextual tooltips and help text
- Drag-and-drop for advanced operations

9. Error Handling & Feedback

User Feedback Mechanisms:

- Loading states with skeleton screens
- Success/error toast notifications
- Inline validation with helpful error messages
- Progress indicators for multi-step processes
- Confirmation dialogs for destructive actions
- Real-time status updates for trading operations
